## EXPERIENCE

---

### Colorado Legislative Council

October 2022 - Present

*Associate Application Developer*

*Denver, CO*

- Creating and iterating in house applications to improve the Legislative Process for our State Legislators.
- Utilize Typescript and Redux to provide history based rich text editor experience with SlateJS. Developed Printing Experiences that match specific criteria to Colorado Red Books with Spring Boot.
- Manage AWS Deployments and MySQL instances to ensure legislative titles and documents remain up to date and are easily accessible to Legislative staff.
- Providing technology support to Legislative Council and other departments within the Organization.
- Developing applications that allow new staffs to work on industry standard technology and reduce spending by replacing third party services with in house solutions.

### Cognizant

June 2021 - October 2022

*Associate Full Stack Developer*

*Remote*

- Completed in-house 15 week academy training on Full Stack Development (Spring, React, SQL, AWS).
- Immediately placed within the Retail-Consumer-Goods Sales Division after graduation. Provided rapid prototyping capabilities to clients and spearheaded RCG to start transitioning off of PPT/PDF demos.
- Created and iterated over a next generational e-commerce Retail/Beauty Application. Utilized Media pipe libraries to combine retail use-cases with facial tracking and gesture based interactions.
- Managed several different projects utilizing NFC/GeoTech, D3 Data Visualization, and WebXR applications with our Cognizant India and Netherlands teams.
- Owned team work by leading team demos and stand ups with clients, upper management, and upper BU executives.

## PROJECTS

---

### Tun3rs R US

- A full stack E-Commerce Website built from scratch to provide high quality performance parts to tuner enthusiasts around the world.
- Utilized Springboot back end utilizing a MongoRepository that saved product items to a MongoDB Atlas Instance. Front end utilized React and media queries for the presentation layer. Utilized Axios HTTP calls that connected product items JSON to be displayed onto front end.
- Deployed back end via Elastic Beanstalk and front end hosted on AWS Amplify. Demoed to Full Stack Engineering Community Managers on our "graduation day".

## EDUCATION

---

### Meta iOS Developer Professional Certificate

*March 2023 - Present*

Delivered via Coursera

### Arizona State University

*May 2021*

B.S. in Software Engineering

Honors: cum laude

## TECHNICAL STRENGTHS

---

### Technologies

Java, Spring Boot, JavaScript/Typescript, React, Swift, ARKit, JSON, REST
